## **Schiebel Introduces Next-Generation Helicopter UAV at IDEX**

---

ABU DHABI - Schiebel officially unveiled its next-generation Unmanned Aerial Vehicle System at IDEX 2005 in Abu Dhabi, UAE. The CAMCOPTER S-100 is a medium-range, medium-endurance VTOL UAV system designed to provide advanced capabilities for operation in tactical environments.

Sophisticated composite structures and materials allow S-100's speed, endurance and payload capacity to rival that of its fixed-wing counterparts.

The system is currently undergoing thorough flight testing in a wide range of climatic conditions with deliveries to start in the fourth quarter of 2005.
